### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 5, the word --feed-- has been inserted after the word "medium" so as to correct a minor oversight.

In claim 8, line 4, the word "large" has been changed to --larger-- so as to correct a grammatical error.

The above changes to claims 1 and 8 have been made to correct minor formal matter problems without affecting the scope of the claims as originally intended by the applicants.

The following is an examiner's statement of reasons for allowance:

The closest prior art to the present invention is illustrated in Figures 2 and 3 of the present application. Even though this prior art is structurally similar to the present invention, it fails to teach the presently claimed limitations which require that the control section, in response to the detection of a print medium by the print medium detection section, makes the second print medium feed member and the first print medium feed members to transport the print medium in the directions specified by predetermined distances in order to smooth out the curl at the leading edge of the print medium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
